(Coordinated work with county, city, and private landowners as well as local authorities will be sought for removal of noxious weeds that affect all landowners)

9. Statement of Project Goals and Objectives:

Invasive exotic plants and root diseases are degrading wild land ecosystem health at a rapid and ever-increasing rate. They know no boundaries and will spread across all ownerships degrading native habitat. Without major intervention and plant management efforts, these aggressive plants will continue marching through and degrading lands we value so highly. Such plants also have high economic consequences as they replace native plants of economic importance and may do great damage to waterways or riparian habitats.

IPM (Integrated Pest Management) is a combination of methods to combat weeds and root diseases is by using techniques such as prevention, education, and treatment.

The BLM has adopted IPM as its method to combat invasive species. Specifications for treatments are written in compliance with the Medford District Programmatic Environmental Analysis (EA), 1998 and Noxious Weed Environmental Impact Statement (EIS) Record of Decision, 1986.

We received Title II funds for similar work during FY 02 and the results were significant and valuable. (a synopsis is available of work to date).

10. Project Description: (Provide concise description of project and attach map.)

Through a four- year indefinite- delivery, indefinite- quantity contract for the IPM (Integrated Pest Management) services specified.

Services include: Physical cutting and removal ;Chemical spraying as allowed for under the BLM - Medford District Record of Decision (ROD) and Resource Management Plan (RMP), June 1995.;

Other treatment outside of the IDIQ contract include : Bio-Control, using introduced insects species proven specific for weed control; Steam spray application treatment from roadsides.

The proposed project work shall be done in accordance with and precautions taken as outlined in the Medford District Record of Decision (ROD) and Resource Management Plan (RMP), June 1995. This RMP incorporates the earlier ROD for Amendments to Forest Service and Bureau of Land Management Planning Documents within the Range of the Northern Spotted Owl and the Standards and Guidelines for Late-Successional and Old-Growth Forest Related Species within the Range of the Northern Spotted Owl. The specifications are written in compliance with the Medford District Programmatic Environmental Analysis (EA), 1998; Noxious Weed Environmental Impact Statement (EIS) Record of Decision, 1986; Federal, State and local laws, regulations and ordinances regarding transportation, mixing , application and disposal of herbicides.

11. Coordination of this project with other related project(s) on adjacent lands?

☒ Yes ☐ No If yes, then describe.

There are adjacent state, county, and private lands with similar stocking. The BLM will seek out a coordinated effort with other landowners to utilize noxious weed removal techniques on these lands for the common good.

12. How does proposed project meet purposes of the Legislation? [Sec. 203(b)(1)]

- ☒ Improves maintenance of existing infrastructure. [Sec. 2(b)]
- ☒ Implements stewardship objectives that enhance forest ecosystems. [Sec. 2(b)]
- ☒ Restores and improves land health. [Sec. 2(b)]
- Restores water quality. [Sec. 2(b)]

39. Monitoring Plan (Sec.203(b)(6)) What measures or evaluations will be made to determine how well the proposed project meets the desired ecological conditions? [Sec. 203(b)(6)] Who will be responsible for this monitoring item?

1.How will the project be evaluated to determine how well the proposed project contributes towards local employment and/or training opportunities, including summer youth jobs programs such as the Youth Conservation Corps? [Sec. 203(b)(6)] Who will be responsible for this monitoring item?

BLM Contract administrators and Noxious Weed Managers will establish tracking mechanisms that catalog effects of the treatments and the project as a whole. Financial accounting and cooperative efforts will also be shown and available for review upon completion.

2.What methods and measures of evaluation will be established to determine how well the proposed project improves the use of, or added value to, any products removed from National Forest System lands consistent with the purposes of this Act? [Sec. 203(b)(6) and Sec. 204(e)(3)] Who will be responsible for this monitoring item?

BLM Contract administrators and Noxious Weed Managers will establish tracking mechanisms that catalog effects of the treatments and the project as a whole. Financial accounting and cooperative efforts will also be shown and available for review upon completion.
